To ensure that the rings are displayed in the correct size please check that this printout is the correct size. Print the guide and check that you have the right scale.

Select a ring that fits the finger you want to wear the ring on. Use the circles below to find the right size. The inner diameter of the ring must match the diameter of one of the circles.

Be aware that the size of your fingers will often vary according to the temperature, so measure them at room temperature. In summer, your fingers will generally be larger than in winter.
